

## Statement ReMedium Silk Exosome Hair Fill

### *Scalp Care Solution*

The Forever18 International Co., LTD, located in #1001, Daegil Medical Building, 384 Sagajeong-ro, Jungnang-gu, Seoul, South Korea, hereby provides detailed information as below on the ReMedium Silk ingredient.

ReMedium Silk Exosome Hair Fill is the first Adipose Stem Cell Exosome hair filler in the world, developed with Forever18 International's exclusive technology for scalp rejuvenation and hair growth. **It is formulated with over 8 billion exosomes, ensuring a highly potent and effective treatment.**

Exosomes play a crucial role in reducing inflammation by transporting enzymes that generate adenosine, an anti-inflammatory agent that regulates immune activity in the scalp and hair follicles. Exosomes are small extracellular vesicles, around 100 nanometers in size. They play a crucial role in cell-to-cell communication by acting as messengers. Exosomes deliver lipids, proteins, and RNA to cells, triggering biological responses.

They also promote the synthesis of sphingolipids, key components of the skin barrier, which support ceramide production, keratinocyte growth, and immune defense, maintaining overall skin barrier health.
